An artistic blend for engaging spaces

Terrazzo floors and mosaic imagery are two classic methods of infusing interior design with life. The vivid, artistic assortment of small shards inspires a subtle feeling of splendour and elegance in any space.

norament 926 pado offers you a modern take on this masterful design for the digital era. The mosaic-like structures and colours are embedded in warm, modern rubber. This contemporary application of traditional technique makes for a relaxed and engaging atmosphere.

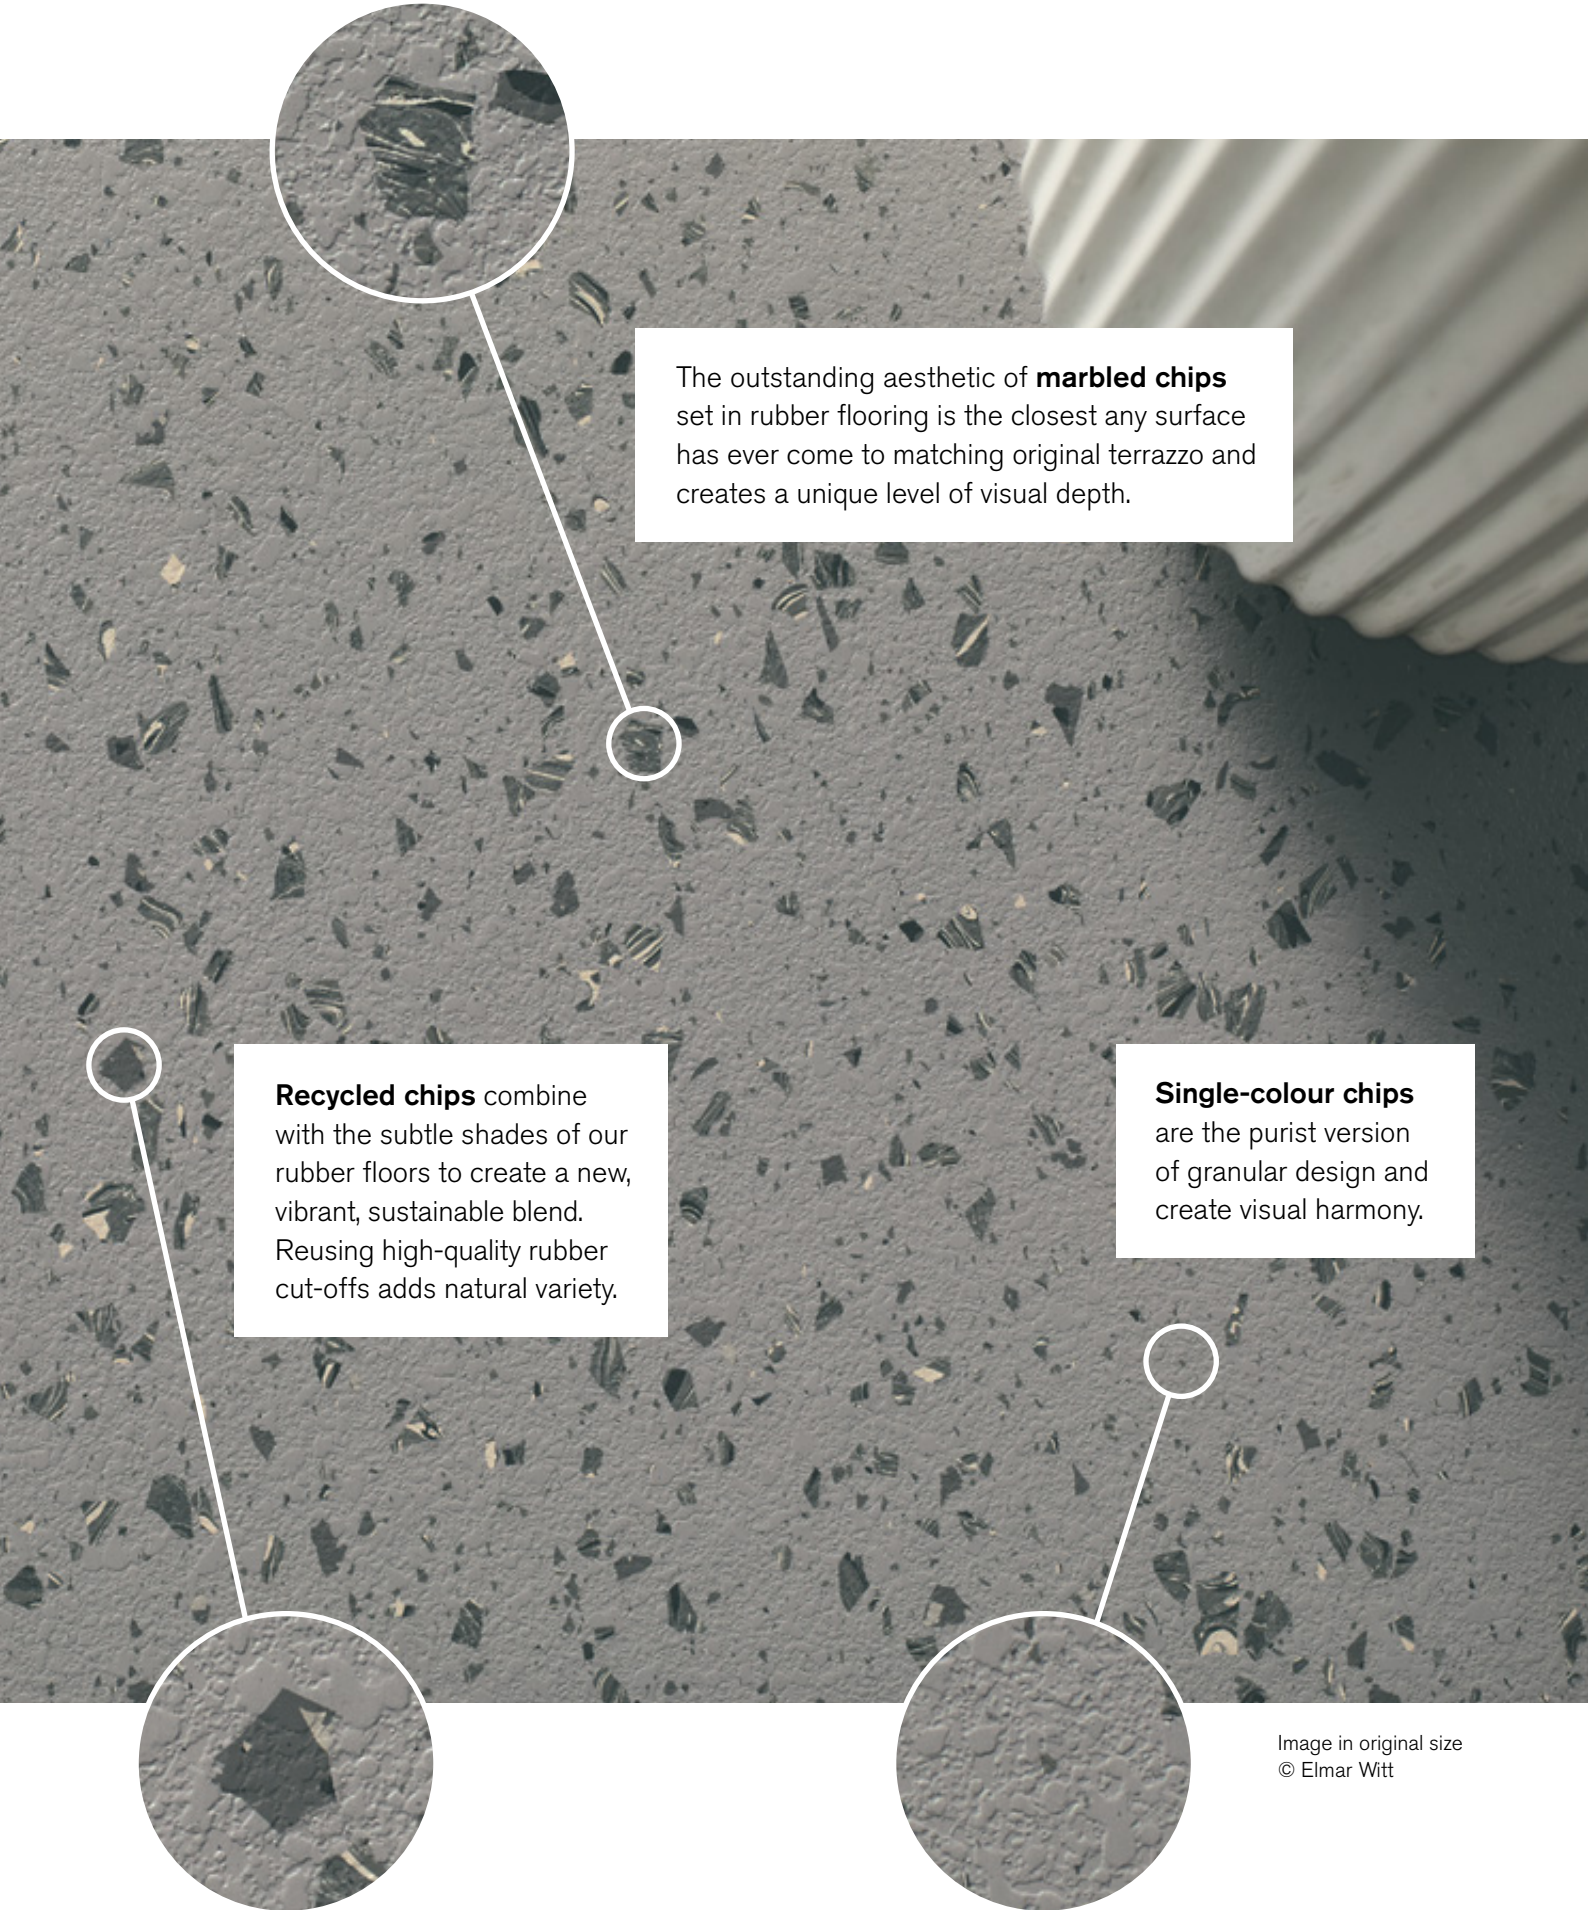

Unique design in every detail

norament 926 pado is characterized by its distinctive design, which features granulate embedded in rubber flooring. With three different approaches, this flooring offers you new perspectives:

- Marbled chips
- Recycled chips
- Single-colour chips

This flooring offers norament's world-renowned resilience and durability, making it perfect for entrance halls, exhibitions and other public spaces.

The outstanding aesthetic of **marbled chips** set in rubber flooring is the closest any surface has ever come to matching original terrazzo and creates a unique level of visual depth.

Recycled chips combine with the subtle shades of our rubber floors to create a new, vibrant, sustainable blend. Reusing high-quality rubber cut-offs adds natural variety.

Single-colour chips are the purist version of granular design and create visual harmony.

A rich blend of coloured chip structures

norament 926 pado tiles are available with a slightly structured two-tone surface in various designs. Choose from neutral and elegant or colourful and contrasting to create a unique floor aesthetic.
