

# nora<sup>®</sup> pads

Four cleaning pads.  
Some water.  
That is the nora system.

by **Interface**<sup>®</sup>

# The cleaning system for economically and ecologically preserving the value of nora rubber floor coverings.

nora pads are floor cleaning disks that are impregnated with countless, microscopically small diamonds. The flooring is mechanically cleaned and polished – just with water and absolutely no chemicals at all. nora pads are suitable for day-to-day care as well as for repairing extremely soiled or damaged floorings. They can be used with most standard types of machine and are available in different sizes. nora pads were exclusively developed for norament® and noraplan® floor coverings.

Apply Water

Clean the flooring with nora pads

A clean result

## The unique advantages of nora pads and how you benefit from them:

nora pads only require water to clean the flooring: no chemicals, wax or polish.

Ecological and economic cleaning; the usual day-to-day cleaning procedure stays the same.

No more costs for cleaning products.

nora pads have been developed specifically for cleaning, finishing, and renovating norament and noraplan floorings.

Preservation or enhancement of your investment throughout its entire life cycle.

nora pads are a consistent continuation of the nora® one philosophy, an economical and ecological solution for safeguarding the value of nora premium rubber floorings.

## Four different pads. Four different applications.

**Pad 0** is used for daily maintenance cleaning and polishing of structured noraplan floor coverings as well as noraplan uni, noraplan unita, noraplan ultra grip and norament floor coverings with two-tone surface.

**Pad 1** is used for daily maintenance cleaning of smooth noraplan floor coverings as well as norament floor coverings with hammerblow or cubic structure. Floorings which have already been cleaned or freshly installed floorings can also be finished in a single operation.

**Pad 2** is suitable for scheduled or intensive intermediate cleaning of smooth noraplan floor coverings as well as norament floor coverings with hammerblow or cubic structure and thus creates the basis for the daily usage of Pad 1.

**Pad 3** removes coarse dirt as well as scratches on smooth noraplan floor coverings as well as norament floor coverings with hammerblow or cubic structure and is ideal during restoration work; in particular where satisfactory results can no longer be achieved using conventional cleaning measures.

nora pads can only be used for norament and noraplan floor coverings. They are not suitable for other resilient or laminated coverings.

Please see our website [www.nora.com](http://www.nora.com) for more details on using nora pads.

Fully equipped for any job: nora pads in 4 strengths and 6 different sizes

**Cleaning.** From daily care to intensive cleaning

**Finishing.** Clean coverings first and then polish to a high gloss

**Refurbishment.** Removing the most stubborn dirt and scratches

## nora pads – the perfect complement to nora one.

nora pads are the perfect complement to nora one.

The combination of low-emission nora floor coverings with suitable floor installation products and flooring installers specially trained by nora form a certified complete system: nora one.

This low-emission complete system is certified in line with Indoor Air Comfort GOLD. This eliminates harmful interactions between the separate elements. The adhesives have also been awarded the Greenguard Gold certificate.

Our nora pads complete this all-in-one system range with a chemical-free cleaning and maintenance solution.

### The system design:

The nora one system — 1 Primer 2 Leveling compound 3 Adhesive 4 nora rubber floor covering
